

Ensure safe and productive web use

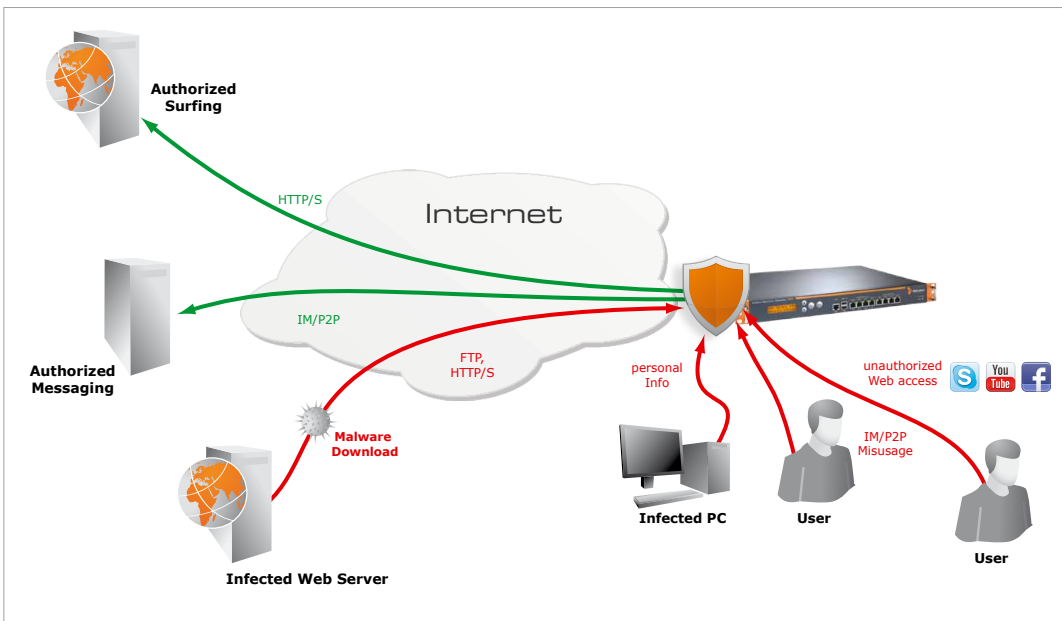

The unrestricted usage of the Internet, unproductive applications like Facebook games, Media Streaming, and File-Sharing Programs not only reduces employee productivity, but can also lead to serious legal liability. Malware hidden within downloads needs to be filtered out to protect users and PCs from infection and data loss.

The Astaro Security Gateway Web Security subscription protects your organization and your users and gives you absolute visibility into how they spend their time online.

Try Now!

Test Astaro Web Security free for 30 Days at:

www.astaro.com/en/freetrial

Benefits

- > Gain a crisp, clear picture of how the Internet is being used
- > Accelerate critical applications by ensuring they have appropriate bandwidth while blocking or limiting unwanted, unproductive ones.
- > Increase your employees productivity by enforcing surfing policies
- > Reduce legal liability risks by blocking access to certain websites
- > Prevent network outages and data loss caused by virus or spyware infections
- > Easily use your authentication servers for creating profiles by user or group

Productive

Ensure Surfing Rules

Select from 96 categories to stop access to illegitimate and non-productive websites at configurable times

See & Control Applications

Monitor thousands of applications: block Facebook games and Bittorrent, limit Youtube streaming, accelerate Salesforce.com

Secure

Prevent Infection

Perform fast, accurate scanning for viruses, spyware and active content via dual independent antivirus engines.

Stop Data Leakage

Block hidden sending of personal information from already infected PCs to the outside world.

Visible

Log and Report

Navigate through reactive reporting to get hundreds of details on user surfing activity; email customized reports to managers.

Protect Privacy

Enable anonymization of user names within reporting data to enforce privacy policies

"With Astaro Web Security our employee casual surfing and time-wasting dropped by about 75%."

Michael Mierwinski, CIO Mid-America Overseas

Technical Specifications

Appliance	ASG 110	ASG 120	ASG 220	ASG 320	ASG 425	ASG 525	ASG 625
Max. Recommended users	10	50	140	320	800	2,200	3,700
Web Proxy Throughput (Mbps)	120	120	260	350	360	400	490
Antivirus Throughput (Mbps)	45	45	80	140	150	220	350

Features

Security

- > Configurable Local or Cloud-Based URL Filter database with 35 million+ sites in 96 categories and 65+ languages
- > Application Control: Accurate signatures and Layer 7 patterns for thousands of applications: Skype, Bittorrent, Facebook, Youtube, UltraSurf, Salesforce, and many more.
- > Malware scanning: HTTP/S, FTP and web-based e-mail via dual independent AV engines
- > Active Content Filter: File extension, MIME type, Javascript, ActiveX, Java, Flash.
- > Spyware detection: incoming and outgoing

Policies

- > Authentication: Active Directory, eDirectory, LDAP, RADIUS, TACACS+, local DB
- > Single Sign On: Active Directory, eDirectory, Apple Open Directory
- > Proxy Modes: Standard, (Fully) Transparent, Authenticated, Single-Sign On
- > Transparent captive portal with authentication
- > Supports separate filtering proxies in different modes
- > Time, user and group-based access policies
- > Allow temporary URL filter overrides with authentication

Management

- > Per-profile settings for all filtering options
- > Cloning of security profiles
- > Customizable user-messages for events in local languages
- > Company logo placement on block-pages
- > Proxy Auto Configuration via PAC files
- > Custom HTTPS verification CA support
- > Frequent URL database and virus pattern updates
- > Setup wizard and Context sensitive online help
- > Windows Server 2008 Native Mode Support

Logging and Reporting

- > Astaro Log Management Service
- > PDF and CSV exporting of reports
- > Nightly compression and rotation of logs
- > Log file archiving: on-box, FTP, SMB, SSH, Email, Syslog
- > Hundreds of on-box reports
- > Daily activity reporting
- > Subscription system for report delivery
- > URL filter override report
- > Per-User tracking and auditing
- > Anonymization of reporting data to enforce privacy policy
